CALVING

RELATIVE BREEDING VALUES - CZE

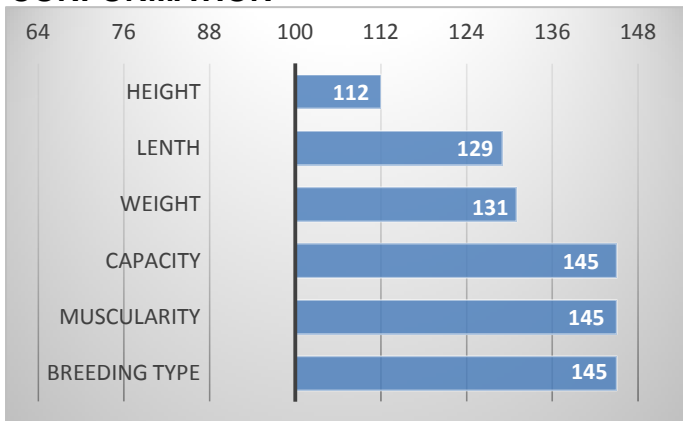

9/2023

GROWTH

Heterozygously polled Holba was born on farm of Polák's family. Holba was above average already as calf and same it was on Testing station in Benešov, where he was awarded by 84 points for exterior. Holba excels in big body frame, amazing body capacity and perfect musculature. 261 kg in 120 days, 405 kg in 210 days and 674 kg in one year confirm his growth potential (czech breeding value 132 for growth in direct effect).

CONFORMATION

Holba's sire is Coose Jericho, his dam's sire is Augustýn Agrochyt (son of Hoeness). The quality of his dam is evidenced by the fact that his half-brother a year before Holba was rated 85 points for exterior! Holba will be a great choice for cows where you want to improve pelvis, body length and muscling.

PERFORMANCE TEST

weight 120 d	261 kg
weight 210 d.	405 kg
weight 365 d	674 kg
daily gain in test	1950 g
daily g. since birth	1733 g

EXTERIOR EVALUATION

Frame			Body capacity			Muscularity			Breeding type	Total
VT	DT	HM	PŠ	HH	DZ	PL	HŘ	ZÁ		
8	8	10	8	9	8	8	8	8	9	84

acronyms: VT - height, DT - length, HM - weight, PŠ - chest width, HH - chest depth, DZ - pelvis length, PL - shoulder, HŘ - top line, ZÁ - Thigs
