## NATURAL

### CONFORMATION

Imperial is a bull with a large body frame and body capacity. In the basic selection he was evaluated with 81 points for exterior.

Imperial weighed 634 kg at one year, with a height at withers of 135 cm. He has a balanced exterior and we expect good growth in calves.

The dam's sire is the well-known show bull Mewil Blackstar 45D, who is a double breed champion. Imperial is recommended for cows of smaller body frame where you need to improve exterior and growth potential.
