

SYMPA PP

Lorenzo PP x Just P

In January 2023, we went to France in co-work with KBS genetic, a leader in France in breeding for polled genetic, to select for our program a homozygously polled bull. Sympa PP was the obvious choice as soon as we saw him. He was born on the excellent Gaec Marcailloux farm, which is a regular successful exhibitor in France. His insemination doses were already exported back to France, where he will be the official bull offered in the KBS genetic programme. Perfect legs, very wide pelvis area and great muscularity on hind quarter, that we expect from horned bulls and especially excellent harmony. Sympa weighed 43 kg at birth and given his pedigree, we predict he could be used for heifers. At the National Show in Brno 2023 Sympa won the highest title, Champion of the breed,

when judge Rikke Benoit (Gaec Benoit) evaluated him as the animal that was born for the show. His excellent pelvis, rump and his exceptional locomotion with gracefulness of movement appealed the most to the judge. Sympa PP is a son of the well-known Lorenzo, whose insemination doses are not available anymore. His calves not only in the Czech Republic are very popular with breeders, Lorenzo is especially the father of top daughters, which can be seen at auctions in France, where today Lorenzo appears very often as a mother's sire. Sympa's dam has a milk production evaluation 107! Sympa is recommended for cows and heifers where breeder wants to improve frame, limbs, back muscularity and pelvis dimensions. We expect the availability of sexed IDs for both sexes very soon.
